How Syfan Logistics reaches peak compliance of 95% and average of 84% with carrier favorite driver app from Trucker Tools

Trucker Tools

SYFAN LOGISTICS
An American Tradition in Transportation

Trucker Tools' mobile driver application and Smart Capacity carrier relationship and capacity management platform provide leading 3PL, Syfan Logistics, with a visibility solution that delivers greater efficiency, high carrier compliance and pinpoint freight location accuracy.

95%
peak time tracking compliance

Tracking accuracy increased by 50%

The number of per load check-calls has decreased by **30%** because of the accuracy and reliability of Trucker Tools' visibility data.

Average tracking compliance success
84%

"Carriers generally prefer the Trucker Tools driver app over other visibility solutions and tracking-only apps because of the additional value Trucker Tools' driver app provides, including information on load matching, weather, rest stops, traffic, weigh scales, fuel prices, optimal routes, repair shops and more. In addition to providing valuable information to carriers, the driver app allows truckers to upload photos of CODs, which ultimately helps carriers and owner-operators to get paid faster."
